

Human Nervous System: Early Programming and Behavioural Integration (Paperback)

By MR Gerald Ugonna Nsugbe

Createspace Independent Publishing Platform, United States, 2014. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.What merely began as an enquiry into Irritable Bowel Syndrome ended in the author identifying at least four factors which underlie psychosomatic, emotional and stress-related diseases and disorders, namely: the nervous system, pregnancy, childbirth and libido-related mutations and polymorphisms of genes. The foundations of the book are laid in an introductory first chapter which gives a brief description of the human nervous system and some of the processes associated with pregnancy and childbirth. In the second chapter, which sets the tone for succeeding ones, the author boldly asserts that human nerve cells oscillate at various frequencies (delta, theta, alpha, beta and gamma) precisely because they are taught to do so during pregnancy and childbirth. From this basic premise, he proceeds in the third chapter to construct a paradigm of libido-related polymorphisms and mutations of genes which explains the origin of a whole host of diseases and disorders closely associated with the nervous system, including: stroke, diabetes, Alzheimer s, schizophrenia and cancer, to name a few. Following an exposition, in the fourth chapter, of some of...
