Reviews

An exceptional ebook along with the typeface employed was intriguing to see. It really is simplistic but surprises within the fifty percent of the ebook. It is extremely difficult to leave it before concluding, once you begin to read the book.

Paul comes up with many ideas while reliving their discussions, and is working on a number of projects at his company s laboratories centered mostly on synthetic biology, DNA, artificial intelligence, and various single celled organisms. Paul will do anything to keep Rhonda s memory alive. Anything. Paul s company, LoTech Laboratories, has developed a new type of photo voltaic, oil eating bacteria, pollution absorbing phytoplankton, Large Cell Technology, Smart Jeans (yes, with a J) and more. Kept secret from the rest of HiTech Labs, Paul and a small team have created an artificial intelligence that lives in a neural network in a hidden lab. The story brings to the reader s attention many philosophical ideas and ethical concerns about the sanctity of life and bio technology. Although the story is fiction, it is based on...
